

## Environmental Policy Statement

---

KNG Partnership are committed to reducing our impact on the environment and promoting sustainability in all of our business practices. We believe that protecting the environment is essential to our success and the success of our community.

To achieve our environmental goals, we will:

1. **Reduce waste:** We will minimise waste by recycling, reusing, and reducing the use of materials wherever possible.
2. **Conserve energy:** We will reduce our energy consumption by using energy-efficient lighting and equipment and by implementing practices such as turning off lights and equipment when they are not in use.
3. **Source sustainably:** We will source products and materials that are sustainably produced and minimise the use of products that are harmful to the environment.
4. **Promote sustainable transportation:** We will encourage the use of public transportation, biking, walking, and carpooling by our employees and customers.
5. **Monitor and continuously improve:** We will regularly monitor our environmental impact and take action to continuously improve our practices.

We recognise that environmental sustainability is a shared responsibility, and we are committed to working with our employees, customers, and community to achieve this goal.
