

Sustainability Policy Statement

At KNG Partnership we are committed to operating in a sustainable manner and minimising our impact on the environment.

We believe that by taking steps to reduce our carbon footprint and support our local community, we can contribute to a better world for everyone.

To achieve this goal, we have implemented a number of sustainability initiatives, including:

- Using environmentally friendly products and materials wherever possible
- Minimising waste through recycling and composting programs
- Using energy-efficient equipment and appliances
- Encouraging our employees to carpool or use public transportation
- Supporting local suppliers and farmers to reduce transportation emissions

We understand that as a micro business, our impact on the environment and the community may be small, but we believe that every little bit counts. We are committed to continually improving our sustainability efforts and inspiring others to do the same.

By working together, we can create a more sustainable future for ourselves and generations to come.
